Chapter 2

chapter two

2.1 section title

As we'll see later in this example, I've already obtained the predicted bounding boxes from our five respective images and hardcoded them into this script to keep the example short and concise.

2.2 section title

As we'll see later in this example, I've already obtained the predicted bounding boxes from our five respective images and hardcoded them into this script to keep the example short and concise.

Chapter 3

Conclusion

we discuss CBAM(convolution block attention model). about channel attention model and spatial model. see 3.1. [h]
